Dear Hiring Team

Allianz

As an Autonomous Vehicle Engineering student—a highly **related field** focused heavily on data architecture and software engineering—I am writing to apply for the Working Student position in **digitalization, AI & automation in claims management**. I am deeply interested in building **practical solutions** rather than theoretical concepts, and I am eager to apply my background in AI architecture to help make your everyday claims processing more efficient.

Your requirement for the **Conception and development of AI agents** and expertise in **Prompt Engineering** perfectly aligns with my recent software projects. I architected "Race Strategy AI," a Retrieval-Augmented Generation (RAG) pipeline utilizing **Python**, LangChain, and the Gemini API. This required the continuous development of **structured prompts and workflows** to successfully ingest, parse, and interrogate dense technical rulebooks. This hands-on experience translates directly to the **Collaboration on modern AI applications in a business context**, specifically in building workflows where AI independently analyzes complex texts and standard tasks.

Furthermore, my experience with **Data analysis** makes me well-equipped to support the **Analysis of large tables and damage data**. While building my interactive "F1 Race Analyzer" application, I engineered robust data handling capabilities using Pandas and NumPy to process extensive telemetry. I bring a highly **structured and solution-oriented approach** to tackling data bottlenecks, positioning me to immediately support your team in **Optimizing workflows in Excel and Microsoft 365** and driving the **Automation of recurring processing steps**.

I am **Currently enrolled in a degree program** and possess the **strong communication skills** necessary to thrive in a fast-paced, collaborative team environment. I am highly motivated to work with **future-oriented technologies such as artificial intelligence or internal ChatGPT** to support your digital transformation. I am available to start as soon as possible and would welcome the opportunity to discuss how I can contribute to your innovative location in Unterföhring.

Thank you for your time and consideration.

Sincerely,
Azmi Rehman Khan
