**Dear Hiring Team**

I am writing to express my enthusiastic interest in the **Working Student – Employee Technology (m/f/d)** position at AutoScout24 Group. As a student of **Autonomous Vehicle Engineering** at Technische Hochschule Ingolstadt, I am deeply passionate about technology and its power to boost productivity. I am eager to join your team in Munich to provide high-quality IT support with a "human touch."

My background and skills align closely with the requirements of the Employee Technology team:

- **Technical Troubleshooting & OS Proficiency:** Through my engineering studies and personal projects, I have developed a strong command of **Windows and MacOS**. I am comfortable navigating hardware setups and software configurations, ensuring that notebooks and accessories are perfectly prepared for both new joiners and existing colleagues.
- **Analytical Problem-Solving:** Engineering has trained me to approach technical issues systematically. Whether it is handling support tickets via **Jira and Slack** or troubleshooting connectivity during internal events, I pride myself on finding efficient solutions and communicating them clearly to users of all technical levels.
- **AI Curiosity & Innovation:** I am particularly drawn to AutoScout24's interest in AI-driven productivity. I regularly use AI-based assistants to streamline my coding and study workflows, and I have a fundamental understanding of how Large Language Models operate. I am excited about the potential to apply these technologies to automate routine IT documentation and enhance the overall user experience.
- **Proactive Service Mindset:** I understand that IT support is about more than just fixing machines; it is about empowering people. I am a proactive communicator, fluent in English, and I thrive in collaborative environments where I can take ownership of tasks—from technical onboarding to manufacturer warranty coordination.

AutoScout24's mission to "change the way the world moves" resonates with my studies in autonomous technology. I am highly motivated to bring my technical aptitude and customer-centric mindset to your Munich office. I am available to work 20 hours per week and look forward to the possibility of discussing how I can contribute to the ET team.

Thank you for your time and consideration.

Sincerely,  
Azmi Rehman Khan
