Dear Hiring Manager

I am Azmi Rehman Khan, currently in my fourth semester of Autonomous Vehicle Engineering and officially transitioning to a Bachelor of Science in Applied Informatics for the upcoming Winter Semester—directly aligning with your requirement for a student **Currently enrolled in a degree program in Business Administration, Business Informatics, Computer Science or a related field of study**. I am applying for the RCFO Working Student position. The opportunity to drive digitalization in financial services heavily appeals to me, and I bring a dedicated **AI-first mindset** to help the controlling team automate tasks and build smarter data tools.

I possess a strong foundation in software architecture and **Basic knowledge of AI technologies, their principles and practical application**. I recently built a custom Retrieval-Augmented Generation (RAG) pipeline from scratch using Python, LangChain, and the Gemini API to parse and interrogate dense technical documents. This hands-on engineering gives me direct **Experience or strong interest in AI tools (e.g., ChatGPT, Claude, Copilot, automation platforms)**, and I am highly eager to apply this knowledge toward **improving everyday workflows** for the regional finance function.

My experience building complex data applications perfectly aligns with your need to support strategic cost and revenue planning by providing suitable data tools. I independently developed a full-stack data analyzer that ingests and processes massive amounts of live telemetry into interactive dashboards. Translating complex datasets into clear, actionable reporting is my core strength, which complements my **Strong knowledge of Microsoft Office, especially PowerPoint** for executive presentations and **Excel** for tracking and P&L reporting.

Balancing rigorous engineering coursework alongside independent full-stack development requires **Excellent organizational skills**. I am highly capable when it comes to being able to **manage competing priorities** and ensuring tasks stay on track. I am **Proactive and independent**, constantly recognizing what needs to be done and proposing automated solutions.

I am a **Strong communicator in English (spoken and written)** and can provide all necessary enrollment documents. I would welcome the opportunity to discuss my technical projects with you in an interview.

Kind Regards,

Azmi Rehman Khan
Munich, Germany
